How to Win

Give People Different Goals

Warmaster's Mantle - Most VPs

Blood Thirsty Zealot - Most kill Points

Flag of Dominion - Most Quarters Captured

Quartermaster - Most points from Supply Drops

Forgefather's Seal - Best Painted

Oath of Fellowship - Best Sports

Goals for the missions

When making the missions we had a couple of goals

- Have a narrative
 - Reasons to move your units
 - Reasons to engage with the enemy
 - Promoting list diversity
 - Promoting Army Diversity
 - Making it feel like a battle in the Horus Heresy Narratively
-

Rules Changes

Line (X) and similar rules

Rules Change: You cannot score more than 3 bonus points from Line or similar rules in any of your player turns

Reason: We found that line points far exceed primary objective scoring and just maths terribly. In addition several armies cannot score line as well as marines therefore immediately ending the game at basically deployment

Vanguard (X)

Rules Change: Vanguard can be scored against any unit that BEGAN that turn holding an Objective

Reason: Thanks to several reactions it is possible to make it so that vanguard can be nullified really easily and not see play at all. Vanguard is very hard to score as it requires winning combat and a failed check.

Reacting into Vehicles - you may not make a movement reaction and use it to embark into a vehicle

Secondaries

Supply Drop Objective

Taking queues from the Old World we are adding in an objective you can bring along. A 100mm round base that counts as difficult and dangerous terrain. Feel free to hobby anything on this to represent your factions supply needs

Reason: This has added so much to the old world from a hobby perspective that its insane not to have it. It will promote creativity and fun. Mechanically though we hope it gives deep striking, infiltrating units a job and promotes units that will get into the enemy back lines while creating the need to protect your own

How to deploy: Supply drop

Players roll off, the loser goes first to deploy theirs wholly within their territory, 3" from any objectives and 1" away from any terrain

During the game treat a supply drop as dangerous terrain and grant a 6+ cover save to models within the boundary.

How to score: Supply Drop

Supply drops are held like an objective but can only be held by infantry units.

If at the end of the game you still control your Supply Drop you score **2** VP

Destroying Supply Drops

In order to destroy an enemy supply drop you must control it like an objective at the end of your turn. This can be done by any infantry (including **heedless**) or **vanguard** units. If that unit still does at the start of your next turn you successfully destroy it. If successful you score **10** VP

Domination Objective

This is a table quarters Secondary that is scored at the end of the game.

Reason: There is a common theme in Heresy to create big deathstar units, however needing to have multiple units in different quarters at the end of the game might promote smaller units whose jobs it is to seize ground. Also it feels narrative to conquer land in the heresy

How to score: Domination

At the end of the turn count up all the units in each table quarter (Vehicles don't count). Each unit has a **holding value** equal to the number of models in the unit. Dreadnoughts use the **bulky** value instead of the number of models. If a unit is within two quarters select one that unit is in, and only models wholly within that quarter are counted for the **holding value**.

For each quarter:

If you have a higher total **holding value** than your opponent you score 2 VP

If the total **holding value** you have is double the number your opponents has you score 3VP

If you control a table quarter and there are no enemy units in that quarter you score 4 VP

Victory Conditions

Kill Points

For calculating kill points for the victory condition please use the table below for units that are below their starting size but not destroyed. If a unit is a single model use the number of wounds or hull points taken to calculate how many points they offer.

Fully Destroyed	100%
75% or more destroyed	50%
50-74% destroyed	25%

If the unit is **expendable** (X) reduce the number of points given up by 25% per number, e.g. **expendable (3)** would give up 75% less points.

Terrain Types

Craters: This grants a 6+ cover save and is also difficult terrain.

Barricades: This grants a 5+ cover save and is also difficult terrain. Vehicles also treat this as impassible.

Ruins: This grants a 4+ cover save. The entire "L" side of the shape blocks line of sight (irrespective of the model). This "L" side also blocks movement for all models through that side, you must go round

Missions

Mission One - The Clash

A swirling maelstrom of destruction and death, this planet, this war was not what the crusade was meant to be. Your force is cut off from the main battlelines and in front of you lies an enemy force. There's no room for compromise, there's no room for hope, you must establish a foothold in this hell.

7 Objectives

Secondaries - Domination

Scenario Special Rules:

Objectives in Home Territory are Worth 1VP

Objectives in Middle are Worth 3

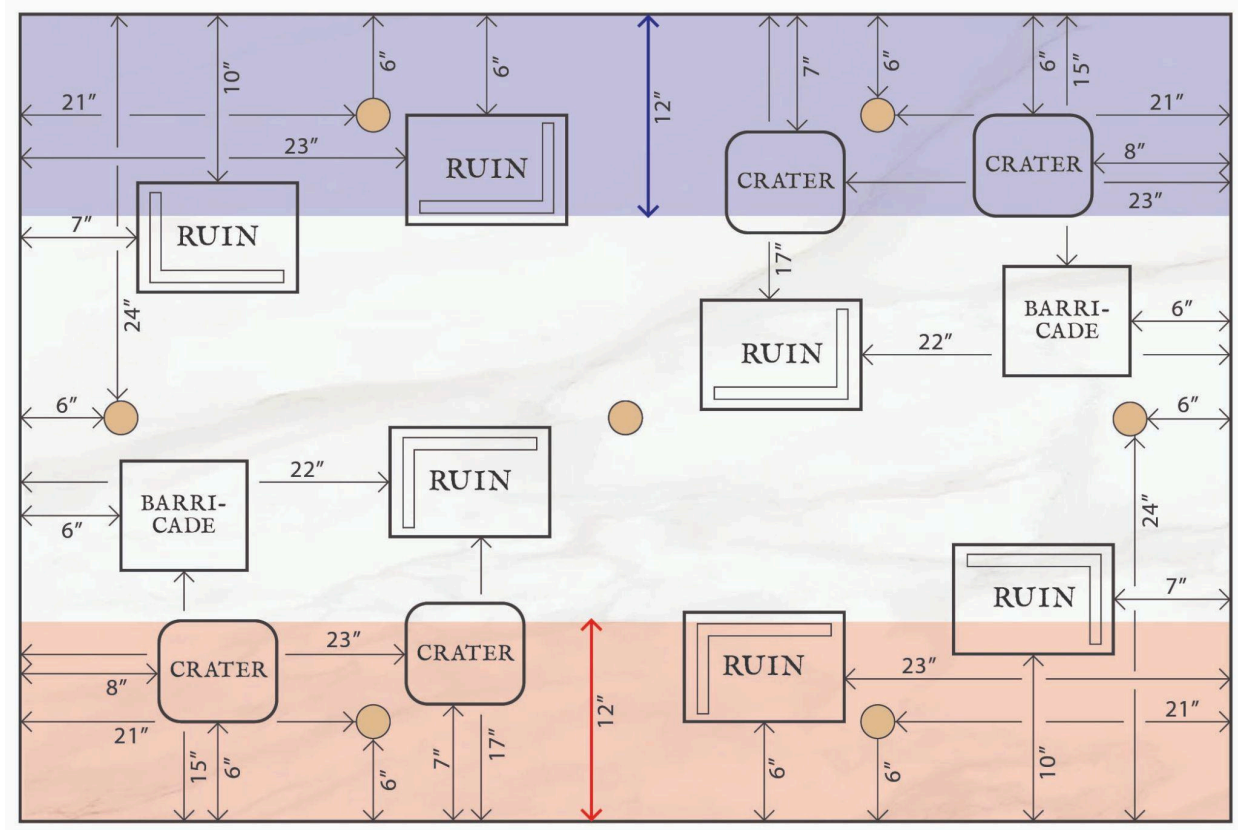

Objectives in Enemy territory are Worth 4VP

Slay the Warlord 2

Giant Killer 3

Last Man Standing 4

First Strike 4

Mission 2: Establishing Communications

The commander cries, "we must establish communications with the fleet". Fresh from the horrific clash its clear this planet will use up everything your force has. You must reconnect, you must establish communication., Station by station, step by step your force must wade into the horror, hold and build the network to send the signal.

Objectives 9

Secondaries Supply Drop

Scenario Special Rules: You must hold one for a turn before you can hold 2 and must hold 2 for a turn before you can score 3

1 is Worth 1

2 is worth 3

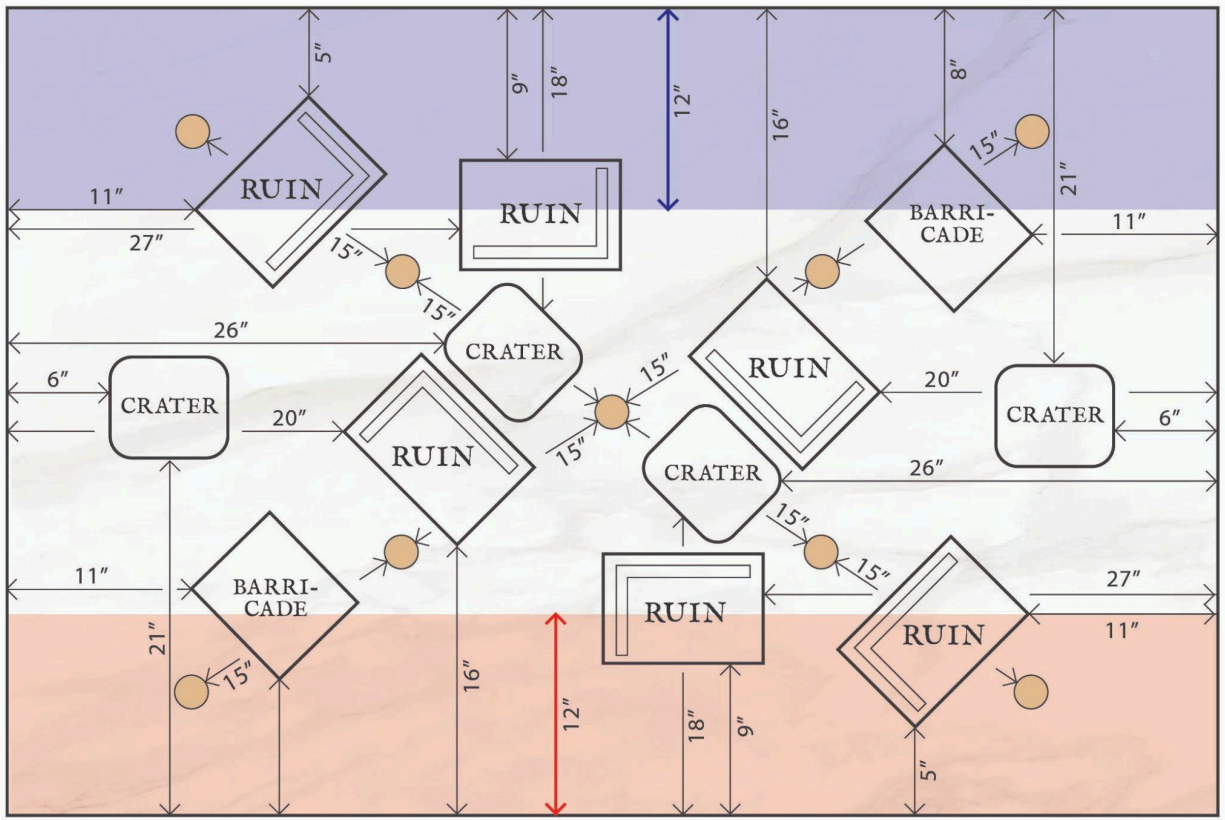

3 Is worth 5 for each line leading to 3

Slay the Warlord 4

Giant Killer 2

Last Man Standing 3

First Strike 2

Mission 3: Orbital Support

“Supplies incoming, secure the drop zone” Precious munitions are on route but the titanic energies and blasted warp waves unleashed on this cursed rock are messing with navigation. Locate the drop sites and secure the area. Overrun enemy positions and bleed them of all resources. Suffer not the enemy.

Objectives 8

Secondaries: Domination

Scenario Special Rules: At the beginning of each Battleround the active player going first during that round randomly generates which of the 4 objective sets are active. Only those objectives are considered objectives for this battleround.

Once the objectives have been scored then they are removed from the available choices during the next round.

The player going second each battle round can once per game force the player going first to redraw from the remaining available objectives which objectives are active for that turn

Example: Battle round 1 and 2 Objectives A and B were activated. At the beginning of battle round 3 the active player randomly generates C. The inactive player chooses to make them redraw from the remaining pile. As there is only Objective D left that is the one chosen

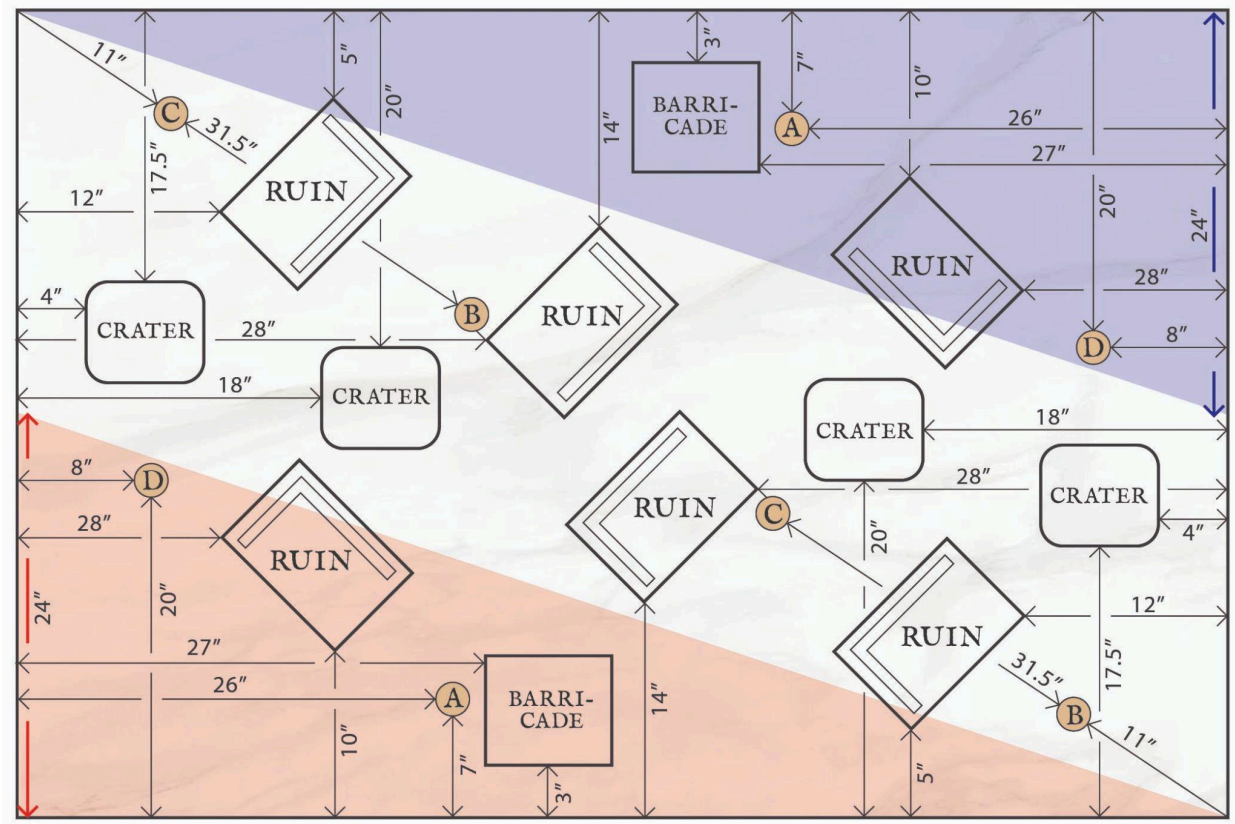

all objectives 4

Slay the Warlord 3

Giant Killer 3

Last Man Standing 3

First Strike 3

Mission 4: Resupply

With supplies secured your force must refit, reload and ready for an exit strategy. The war will not be won here, this is but a shadow of the flames engulfing the stars. You must break free but first hold the line against the seemingly endless enemy

4 Objectives

Secondaries: Supply Drop

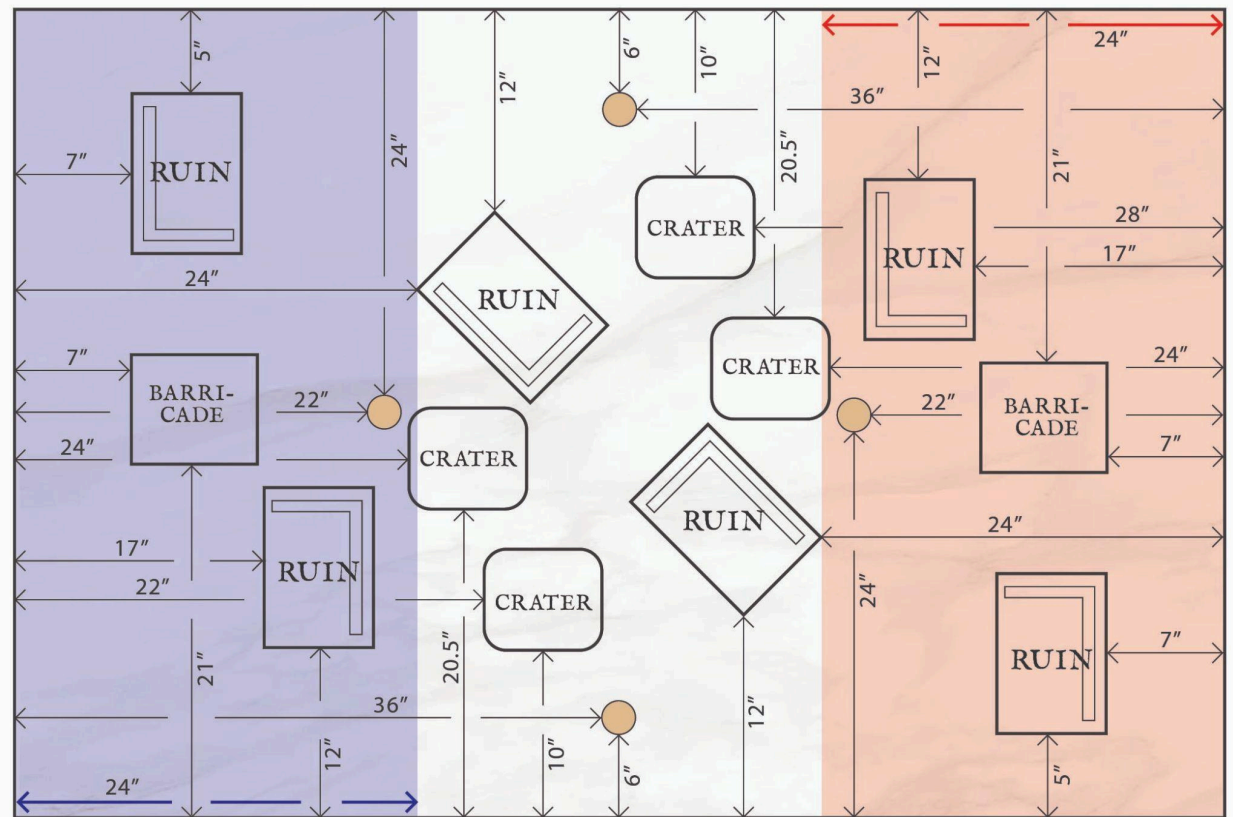

Scenario Special Rules: You score more points the longer you hold an objective uninterrupted

Hold for

1 Turn = 2VP

2 Turns = 4 VP

3 Turns = 6 VP
 4 Turns = 8 VP
 Slay the Warlord 4
 Giant Killer 2
 Last Man Standing 4
 First Strike 2

Mission 5: Evacuate the High Command

We need leaders, so many lost, so many betrayals. After this we may never be what we were before. Why won't they see we are right!? We must get the commanders off this planet. They can bring the experience of what happened here to our forces. They can lead us to victory. All we must do is hold on for one more battle and take as many of them with us as we can.

4 Normal Objectives - 2VP
 1 High Objective - 3VP
 Secondaries: Domination
 Slay the Warlord 10

Scenario Special Rules: Only a unit Filling a High command slot can score the High objective.
 At the end of the game if a High Command unit or unit a high command model is part of is holding the centre objective then you score 25 VP
